Field of the Invention The present invention relates to an image output apparatus and an image output control method. 2. Description of the Related Art An image processing apparatus that includes an information processing apparatus such as a digital multifunction peripheral and stores therein image data is known. Upon receiving a read instruction from a user, the image processing apparatus reads the stored image data and outputs the data to a connected display apparatus such as a printer and a projection apparatus. The image processing apparatus described above is also configured so as to receive a request for outputting an image stored in a storage device such as an external storage apparatus. In order to request outputting of the image stored in the storage device, the image processing apparatus executes, for example, an operation in which an application software program that has an image output function is started, the image is output from the storage device to the connected display apparatus, and then user authentication information is obtained from a user. With a method in which a user inputs an operation in which an image is output
